EXPERIENCE

Software Developer, PowerApps to React Migration and Automation

Apr 2026 - present

Greene Information Systems · Remote (US)

- Migrating legacy PowerApps into production-grade React, Vite, and Tailwind apps using an AI-first workflow.
- Claude Code and Codex as primary tools for planning, code generation, and refactoring; features owned end to end.
- Unattended automation on Azure Automation: Python runbooks that reconcile ConnectWise, carrier tracking, and SharePoint on a measured schedule, replacing fragile Power Automate flows.
- Deploys to Azure Static Web Apps via Azure DevOps; integrations across Microsoft Graph, SharePoint, Teams, and external platforms, with documented handovers.

Full-Stack Software Engineer

Feb 2025 - Jul 2025

Indicia Worldwide · Remote (UK)

- Converted Figma designs into responsive Angular components for the In Touch marketing-optimisation SaaS.
- Shipped a dynamic grid layout system with merge and unmerge cells and nested accordion tables.
- Spreadsheet-format export and complex UI components, integrated with a Java backend.
- Recognised by the Global Head of Engineering for "speed, diligence, and technical expertise."

Packaged App Development Senior Analyst

Jun 2024 - Feb 2025

Accenture · Cebu, PH

- Built income tax modules for IRAS, Singapore's tax authority, in Angular with a micro-frontend architecture.
- NgRx state management and reactive forms across high-traffic citizen-facing modules.
- Authored comprehensive Jasmine unit tests; raised coverage and reduced regression incidents.
- Onboarded onto a complex Angular, NgRx, and micro-frontend stack in weeks while keeping delivery velocity.

Senior Full-Stack Developer, Top Rated Plus

Feb 2023 - Nov 2024

Upwork, long-term client engagements · Remote

- Delivered a 1,618-hour enterprise SaaS engagement building Angular features end to end with consistent five-star ratings.
- Built Quipnex Laboratory Inventory: Ketcher chemical structures, drag and drop, Google Maps, undo and redo, rich text.

- Designed reusable component libraries and a complete design system that accelerated downstream feature delivery.
- Top Rated Plus badge (top 10%), 100% job success across 15 completed projects.

Application Systems Engineer
Fujitsu GDC Philippines (via WeServ) · Cebu, PH

Feb 2021 – Oct 2023

- Built and supported moderate-to-complex integration processes for enterprise clients.
- Calendar Note (team collaboration with mentions and task assignment) and DPulse (desktop log analyser, 500k+ rows).
- Deep-learning image-classification system using TensorFlow and Keras.
- Awarded the STARS Big Thank You Award for outstanding client commitment.

Software Engineer, Android Developer
Koda Kollektiv · Mandaue City, PH

May 2019 – Sep 2020

- Shipped multiple production Android apps in Kotlin and Firebase.
- The MailBug Android email client for older adults, accessibility-first by design.
- GPS-based services and real-time database sync across consumer apps.

EDUCATION

B.S. Computer Engineering · Cebu Institute of Technology — University, Cebu City, Philippines

Jun 2014 – Mar 2019

SKILLS
